I am learning to recognise the features of an explanation texts.

Bean to Bar: How Chocolate is Made.

Chocolate is made in a nine-step process and this explanation text will walk you through how.

Harvesting

I grow in a pod on the cacao tree and the pod protects me from ravenous birds. Cacao trees grow in tropical climates throughout the world where it is hot. Unusually, cacao trees have both flowers and fruit on the tree at the same time. The fruit of my tree is known as the cacao pod, which grows on the trunk and branches. The farmer who picks me uses a sharp machete. He takes care not to damage my trunk so that more pods can grow in the future.

Fermenting

Afterwards, the pods are opened and I am exposed to oxygen. Then the fermentation begins. Fermentation happens through the work of tiny living things called yeasts and bacteria and they make chemical changes in me. I am wrapped in banana leaves and put inside a wooden box. The box has holes so that any liquid can escape. I am mixed around and my temperature rises to as high as 40-50°C. For eight days, my flavour gradually develops.

Drying

Following the fermentation stage, I am full of moisture, which needs to be reduced. In most countries, I can be dried in the sun. In wetter climates, however, this is not possible so in places like Papua New Guinea, I am dried beside an open fire until I have a smoky flavour. Once I am dry, I am placed in a bag and shipped to chocolate makers around the world.

I am learning to recognise the features of an explanation text.	
Explanation text feature	Evidence.
A main title shows what the text is about.	
The text is split into sections about the process. The sections have sub-headings.	
Time conjunctions open some paragraphs.	
Topic words. (technical vocabulary).	
It has conjunctions to add more detail to clauses.
